

Do you have a stream on your property and live in the Village of Bentleyville? If so, check out this free virtual workshop and free live stake giveaway opportunity!

Chagrin River Watershed Partners partnered with Cuyahoga Soil and Water Conservation District (CSWCD) to bring you a virtual presentation on backyard stream maintenance. In this presentation Jared Bartley from CSWCD covered stream science and management. This pre-recorded workshop can be found here:

<https://crwp.org/residential-stream-maintenance-workshop/>

In this workshop you will learn about live stakes and how to plant them. Live stakes are dormant cuttings of native trees/shrubs that have the ability to root and produce new growth when planted in soil. As part of this workshop there are also a limited number of free live stake bundles available!

If you are interested in receiving a free bundle of live stakes to plant on your property, please register by emailing Eric Pretzlav at epretzlav@crwp.org by **December 15**. Be sure to include your name and your community in your email. The live stake pick-up location and time details are currently being finalized and will be shared to all registered participants!
